Hello ASEAN Secretariats,

My apologies for not having prepared a Proposed MOU.

This message describes my search for a University / Corporate sponsor wanting an ideal short term or long term TEAM software development project because, it is unlikely one person has all necessary coding skills. Teams work online at http://GitHub.com/. Numerous GitHub tutorial videos are available free of cost in YouTube.

Abstract:
This 7 million jobs economic development project is developed and managed by the Asian Highway Network's Tourism Development Division. The goal is to bring up to 7 million part-time tourism related opportunities into each of the 84 locations being serviced. We provide funding of up to USD $1 million per year per country to Government Tourism Officials in each participating location. Funding is to be used in furtherance of the Siem Reap Declaration on Tourism and Culture – Building a New Partnership Model and the United Nations Post-2015 Development Agenda.

1.0 Introduction

This is a brief description of what I require to begin testing the project in all 10 ASEAN Nations. The "7MillionJobs.com" tourism development project is inspired by and built upon this "UNWTO/UNESCO World Conference on Tourism and Culture - Building a New Partnership Model" PDF brochure, which took place in Siem Reap, Cambodia on 4-5 February 2015.

2.0 Team Members Recommended Software Competencies Include:

Interest in and ability to collaborate online with others;
Interest in or ability to adjust, modify and tweak this WordPress Theme;
Interest in or ability to adjust, modify and tweak this video uploading script;
Interest in or ability to tweak our uploaded videos via this software;
Interest in or ability to adjust, modify and tweak this crowdfunding script;
Interest in or ability to adjust, modify and tweak this bbPress forum script;
Interest in and ability to modify the locations and images seen here.

Great Asian Highway Forum for collaborating

4.0 Conclusion

The Pan American Corridor must completely include:
https://en.wikipedia.org/wiki/CanAm_Highway;
https://en.wikipedia.org/wiki/NAFTA_superhighway;
https://en.m.wikipedia.org/wiki/Pan-American_Highway

Android iOS optimized versions must be included a.s.a.p.

After eliminating major software "challenges" and completion of an initial design suitable to launch this pilot experiment within the ASEAN, team members will migrate it into "the cloud". Maintenance is desired.

I can offer economic incentives, employment opportunities, sponsorship name - logo recognition, product - service reduced fee access, profit sharing, output based and gain sharing incentives.

Looking forward to your positive response,

DeVictor Mason, Chief Development Officer
